# iLX-705D / iLX-F905D / iLX-F115D / i905D Series
Change Start-Up Logo procedure
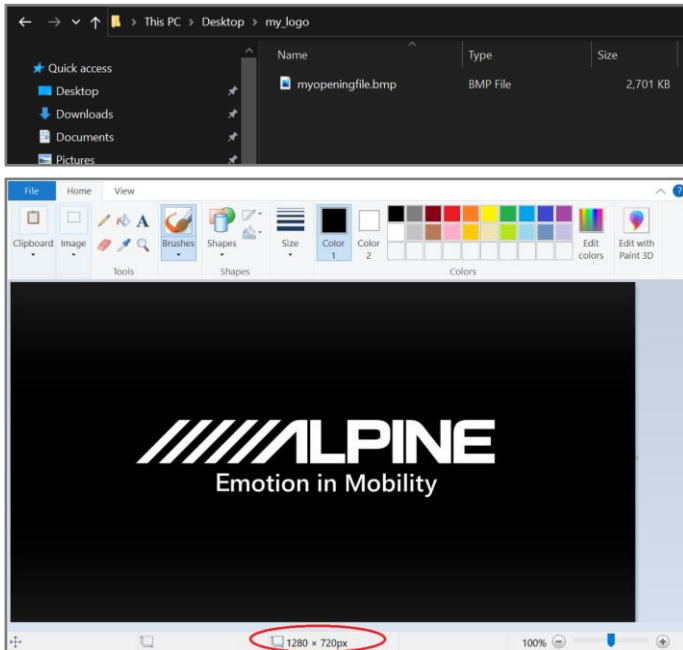

//////ALPINE

Generate the Car by Car Start-Up Logo

1 Open the link https://cbc-configurator.alpine-europe.com/logo.

**2** On the site click the "*Browse*" button

**3** Select your logo, make sure the logo file resolution is 1280x720px.

Generate the Car by Car Start-Up Logo

4 Select the Head Unit model.

**5** Enter a Name for your file (for example your name or vehicle).

Generate the Car by Car Start-Up Logo

6 Push the "*Upload Logo Data*" button and wait for 30 seconds until the download link is shown.

7 *Right-Click* the link and select "Save Link As…". Select a location on your computer. Open the location by using the File Explorer.

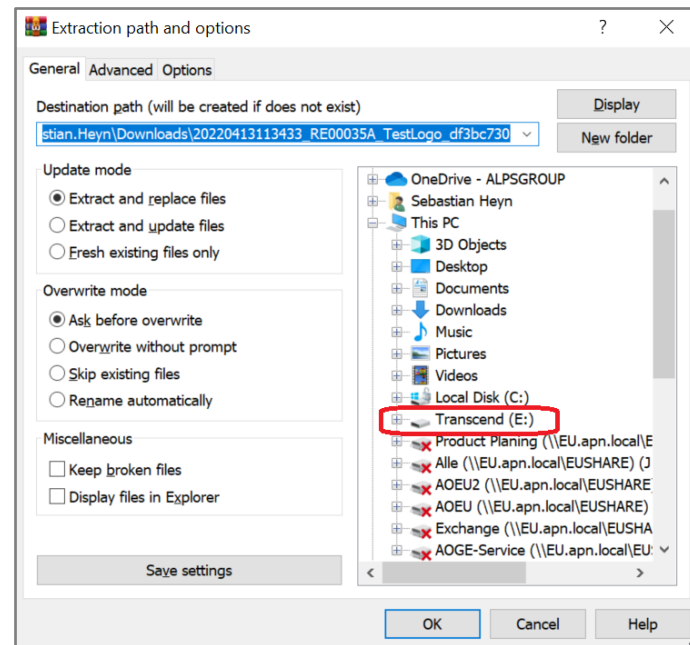

Generate the Car by Car Start-Up Logo

8 Open the file with an unpack utility, like *WinZip*, *rar* or *7z*. *Right Click* the file and select "*Extract Files to…*".

9 Select your (empty and FAT32 formatted) USB stick and click "*OK*".

**10** The folder structure on the USB stick will be created. It should look similar to this:

ALPS ALPINE EUROPE GmbH, Alpine Brand

//////ALPINE

**Update the Car by Car Start-Up Logo**

11 Connect USB stored Car by Car data with black connector.

**12** Insert the USB stick into the Alpine Head Unit and open the menu. Select "*Setup*".

13 Select "*System*".

Update the Car by Car Start-Up Logo

14 Scroll down to the bottom. Select "*About*".

15 If you created the USB stick correctly, the *Car by Car Update* "*Update*" button will be enabled.

16 Click "*OK*" to confirm you want to customize the unit.
